The Honorable General Assembly
75th General Assembly
First Regular Session
Colorado State Capitol
200 E Colfax Avenue
Denver, CO 80203

Dear Honorable Members of the Colorado General Assembly,

For decades, Colorado has served as a national leader in the technology innovation sector. Our state is proud to be home to cutting-edge companies and national laboratories that drive our economy and jobs, while also championing groundbreaking consumer protection laws like the Colorado Consumer Protection Act.

Over the past year, stakeholders and legislators together have worked to find the right path forward on Colorado's first-in-the-nation artificial intelligence regulatory law created by SB24-205. This bill established a regulatory framework that seeks to lower the risk of algorithmic discrimination in AI-based decision-making technology.

The stakeholder collaboration that took place over many months leading up to and during the 2025 legislative session brought many ideas, concerns, and priorities to the table from a wide range of communities. However, with just hours remaining in the 2025 legislative session, it is clear that more time is needed to continue important stakeholder work to ensure that Colorado's artificial intelligence regulatory law is effective and implementable.

Together, we implore leadership and members of the Colorado General Assembly to take action now to delay implementation of SB 24-205 until January 2027. Colorado communities in every corner of our state deserve the benefit of well-crafted artificial intelligence consumer protection law that more time for stakeholder engagement and policy development work will bring.

This pause will allow consumer advocates, Colorado's business community, and other states to collaborate on a balanced, future-ready framework – one that protects privacy and fairness without stifling innovation or driving business away from our state.

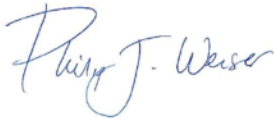

Sincerely,
